The underlying analytics of this report are powered by Fitzgerald MSI and its strategic partners. We will help you to interpret results, but final responsibility for proper interpretation rests with the user. All assessment-related statements should be thoroughly probed by interview responses and behaviors, background data and references, and behavioral performance. Fitzgerald MSI utilizes a generalized assessment procedure. As such, we will support and stand by its interpretations and recommendations but not indemnify the user. It is programmed for general interpretation and should be appropriate for all employee groups, ages, etc. We interpret responses without knowledge of race, color, religion, sex, national origin, age, sexual orientation, or physical disability. It is up to the user to maintain any EEOC- mandated records.

# Introduction

---

The Leadership Forecast Values Report describes your core values and goals and how they can affect your career. Values are an essential part of your identity—they describe who you are, what you stand for, and the environments in which you will flourish. Values powerfully shape the choices that you will make about work, play, and relationships; they will impact your career in four ways.

- 1. Drivers:** Your values are your key drivers—the things in life that motivate you. Values determine your aspirations and symbolize what you strive for and hope to attain. Your values define what you desire in your work and life.
- 2. Fit.:** Your values determine how well you will fit with any organizational culture. Organizational cultures typically reflect the values of senior management. People are happy and productive in cultures that are consistent with their values, and they are distressed and unhappy working in cultures defined by values that differ from their own.
- 3. Leadership Style and Culture:** Your values reflect what you find rewarding and pay attention to or what you dislike and avoid. Thus, your values define the behavior that you like and reward and the behavior that you ignore or dislike. Consequently, your values shape the kind of culture that you, as a leader, will create for your staff and subordinates.
- 4. Unconscious Biases:** Values influence the decisions you make—about people, projects, plans, and strategy. Values filter perceptions of experience, especially about what is desirable or undesirable, good or bad. Values typically operate outside conscious awareness and bias both thought and action.

## Ways to Use this Information.

As you review this report, you may find that your values are inconsistent with your career or the demands placed on you by your role in your current organization. In addition, your day-to-day behavior may not help, and sometimes may even hinder, your ability to realize your career goals. You should not try to change your values if they don't fit with your career or organization. Rather, by becoming aware of your values and unconscious biases, you can begin to adapt your behavior in ways that will create a more productive working situation for yourself and your team.

This report is based on your scores on the Motives, Values, Preferences Inventory (MVPI). The report summarizes your key drivers, the kind of culture you will create as a leader, the organizational cultures that you will prefer (or should try to avoid), the factors that may unconsciously bias your decision making, and possible strategies for minimizing your biases and leading productively.

## Ways to Use this Information.

The next page defines the ten MVPI scales and the following page presents a graphic representation of your values profile. This is followed by the report, which describes the meaning and implications of your score on each scale along the dimensions described above. Finally, the end of this report contains values-based development suggestions designed to help you to increase your leadership effectiveness. Please note that scores between the 65th and 100th percentile are considered high and represent goals towards which you strive on a daily basis. The higher the score, the more important a value or driver is to you in your work and personal life. Scores between the 36th and 64th percentile are average and represent values that are of mixed importance to you. In this range, you may find values that are pleasure points in your life or values where you are fairly indifferent. Scores between the 0 and 35th percentile are considered low and represent values that are not core drivers for you. The lower your score on a dimension in this report, the higher the likelihood that you are indifferent to that value.

### **High and low scores on every scale have important implications for careers.**

The information in this report will help you better understand yourself and your values-driven tendencies. Armed with this information, you can capitalize on your strengths and minimize your tactical miscues. You can become more aware of the culture that you create and use this information to interact more successfully with others in your organization. In a competitive business environment, self-awareness and effective self-regulation are important assets that will allow you to become a more successful leader.

# Development Opportunities

---

## RECOGNITION

- Recognize that others need "pats on the back" more than you do
- Take an active interest in the performance of your staff; ask them for progress reports and tell them when they are doing good work
- Outline explicitly your expectations for your team and each member of your staff
- Be tolerant of any accomplishments your staff may celebrate—even if you choose not to participate

## POWER

- Are realistic about the probable success of your projects
- Understand that others can contribute even if they lack your drive to win
- Don't turn every project into a competition for your subordinates; encourage them to cooperate
- Express appreciation to your staff for their contributions to projects

## HEDONISM

- Recognize that your staff may be more productive if you allow them to relax once in a while
- Encourage "brainstorming" and creative problem solving
- Find ways to reduce your need to "take your work home"
- Allow subordinates to personalize their offices or workstations

## ALTRUISTIC

- Recognize that people may try to exploit your good nature to avoid their responsibilities
- Remember that business requirements are usually more important than staff problems
- Respect the fact that other people may not share your interest in helping the less fortunate
- Remember that hard and important decisions rarely make everyone happy

## AFFILIATION

- Don't let social networking distract you from your leadership responsibilities
- Identify appropriate roles for subordinates as individuals and members of the team
- Show respect for corporate expectations, time limits, and deadlines
- Be sure that your staff perceives you as decisive, assertive, and in charge

# Development Opportunities

---

## TRADITION

- Remember that minimizing status distinctions will annoy those who value organizational hierarchy
- Review your job description and performance goals to help you focus
- Think about company traditions when making decisions
- Provide your staff with clear guidance about performance expectations

## SECURITY

- Give your subordinates clear goals and expectations
- Take time to check relevant facts before making a decision
- Think about the long-term impact of your new projects and ideas
- Ask others for feedback regarding your solutions to problems and challenges

## COMMERCE

- Recognize that satisfaction with the status quo can reduce innovation and productivity
- Develop performance expectations for your staff and review their progress
- Ask others to help you find strategies to increase your contribution to the organization
- Be more assertive in addressing staff performance problems

## AESTHETICS

- Don't allow your curiosity to interfere with finding solutions
- Establish clear processes for solving novel problems or situations
- Be patient with people who don't share your passion for quality
- Take the time to teach your staff about the importance of quality work

## SCIENCE

- Remember that intuitions are useful, but hard data are also important
- Ask your staff for help when solving complex problems
- Consider the outcomes of various options before making decisions
- Delegate problem solving to the experts on your staff
